

## Product Bulletin

# Brightway™ A124

## Concentrated Acid Cleaner

### Features

The Brightway™ A124 is designed to maximize the power of acid cleaning while minimizing corrosion. This is accomplished with a unique blend of acids and surfactants.

Brightway™ A124 is capable of removing hard scale contaminants as well as bacterial slime. Aluminum and Stainless Steel surfaces are brightened with a single application.

### Advantages and Benefits

The Brightway™ A124 competitive edge:

- Acid concentrations are optimized to prevent equipment corrosion and potential employee chemical exposures.
- The stability of the foam ensures adherence to vertical surfaces.
- Fast acting formulas and excellent rinsability characteristics so that surfaces can be free-rinsed with water.
- Adds the sheen back to aluminum and stainless steel to minimize deposit formation and

for visual impact.

- Ease of application assists employees in initiating and monitoring the cleaning program.
- Dissolves hard-to-remove calcium and other inorganic mineral deposits.

### Application & Equipment

Apply evenly using the TWI Foam-Miser™, Lafferty or other centralized system. Rinse prior to drying.

Brightway™ products are used in many food processing facilities as part of the SSOP. For example,

Poultry Chillers

Cooking Tanks

Evaporators

Fermentation Vats

Contact a TWI sales representative to custom formulate a Brightway™ Series product for your application.
