NuKLEEN™ A-123 Series

Wet End Cleaners

Features

The NuKLEEN A-123 Series of products are excellent organic acid wet end cleaners for both acid and alkaline systems. They aid in the removal of contaminants and bacterial slime.

The NuKLEEN A-123 Series of products are recommended for the following applications:

- Fourdrinier framework
- Forming boards
- Approach piping
- Saveall areas
- Paper mashing storage chest
- Pulp dryer storage chest
- Cement floor brightner
- All stainless piping

Advantages and Benefits

The NuKLEEN A-123 Series offers the following advantages and benefits:

- The stability of the foam ensures adherence to vertical surfaces.

- Fast acting formulas and excellent rinsability characteristics reduce downtime.
- Adds the sheen back to stainless steel to minimize deposit formation and for visual impact.
- Ease of application assists employees in initiating and monitoring the cleaning program.
- Dissolves hard-to-remove calcium deposits that create off-spec paper.

Application & Equipment

Apply evenly using the TWI Foam-Miser™ or centralized system. Rinse prior to drying.

Precautionary Statements

Always wear proper protective equipment when using or working around this product. Consult the MSDS for safety information and handling precautions.
